

Choosing the right biocide is important.

Solving bacteria and fungus problems is serious business.
It's important to make the **right choice**. Here's what you need to know.

BIOCIDES TREATMENT		BELLCIDE	ISOTHIAZALONE (i.e. Kathon FP 1.5)	BORON-BASED (i.e. Bio-Bor)	CARBAMATE (i.e. Priocide, Aquatreat)	WATER ABSORBER (i.e. Star-tron)
	Contact time to a complete kill (how long does it take to work?)					WILL NOT KILL MICROBES
	Effectiveness after 1 week (is it still working after one week?)					WILL NOT KILL MICROBES
	Effectiveness after 4 weeks (is it still working after four weeks?)					WILL NOT KILL MICROBES
	Sensitivity to pH (do microbial acids in the fuel keep it from working?)					WILL NOT KILL MICROBES
	Dual-Phase Effectiveness (does it work well in water phase?)					WILL NOT KILL MICROBES

= Best Choice

= Acceptable Choice
