Coleman A. Young, Mayor
City of Detroit

Mr. John R. Walton
Energy Additives, Inc.
4541 W. Dickman Rd.
Battle Creek, MI 49015

Dear John,

I just wanted to take a minute to let you know how happy we at Vehicle Management are with DSL-5. Seldom do we endorse a product. However, when a product works as well as yours, we are glad to endorse it. The City of Detroit has been using your diesel fuel additive since January of 1986. Prior to that we had tried most of the well known additives on the market. We feel your product has out performed all of the others.

We have not had one instance of vehicle downtime for fuel jelling since using the additive. Before 1986 this had been a serious problem on cold winter mornings, with as many as 20 and 30 vehicles being down on any given morning.

Since using the additive we have noticed a significant reduction in exhaust smoking. We feel this is important in a dense metropolitan area like Detroit.

We just don't have any fuel related maintenance problems any more. Fouled injectors and carbon buildup in cylinder heads have been eliminated. This has also resulted in better starting, better performance and better fuel economy.

The use of your product has been very cost effective. The City of Detroit has not only saved money, but we have a more reliable fleet and so need less backup vehicles.

Sincerely,

Alton L. Minter
Superintendent
Vehicle Management
